

## Checkerboard Exercise

Saturday, October 15, 2022 9:13 AM

The `index.html` file contains 25 `<div>` elements, each with the class of `square`. Please create a simple checkerboard pattern by making the **even squares black** and the **odd squares red**. Your result should look like the image below. Please write your styles in `app.css`, and do not change ANY of the styles in `NO_TOUCHING.css` :)

**Please note:** the solution needs to select both the *even* and *odd* squares, changing the background color of the entire board will work visually, but will not pass the exercise parameters.

## HTML

[illegible]

## NO-Touching CSS

```
/* DO NOT TOUCH THIS FILE!!! */
.square {
  width: 100px;
  height: 100px;
  box-sizing: border-box;
  border: 1px solid black;
}
/* DO NOT TOUCH THIS FILE!!! */
/* THIS CODE WILL MAKE SENSE ONCE WE COVER FLEXBOX! */
#board {
  display: flex;
  margin: 0 auto;
  width: 500px;
  flex-wrap: wrap;
}
/* DO NOT TOUCH THIS FILE!!! */
```

## app.css

```
/* WRITE YOUR CODE IN HERE!!!! */
.square:nth-of-type(even){
    background-color: black;
}

.square:nth-of-type(odd){
    background-color: red;
}
```

```
<div class="square"></div>
<div class="square"></div>
<div class="square"></div>
</div>
</body>
</html>
```
